Power Query Workshop

Based on our Book 'M is for Data Monkey'

Who Should Attend?

If you somehow manipulate data in any way or form, then this is a workshop that can help you **master your data with ease**.

This workshop is aimed towards **Excel and IT / BI users** that want to master their data with Power Query and Power BI.

Why the Power Query Workshop?

Led by world class instructors with years of experience teaching Excel users to be more efficient. Built on real world examples, you'll get practical knowledge delivered in an online workshop format, as well as the chance to engage with our instructors.

General Info

What is Power Query?

Is simply the best transformation and data manipulation tool for Excel. If you use Excel to transform, enrich, append or merge your data then this tool is what you need.

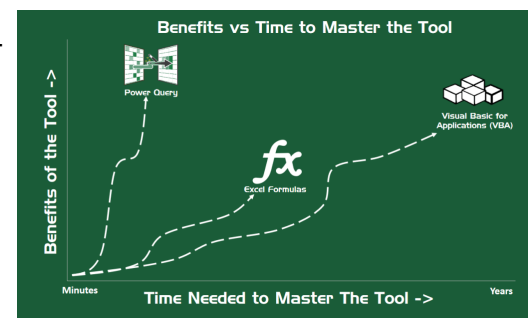

In short, Power Query is:

- The best FREE Excel add-in since Power Pivot (Created by Microsoft)
- Easier to use, understand and master than other tools
- And it also has a Powerful BI & Cloud Story

The Benefits

As far as data manipulation and transformation goes, Power Query beats any Excel tool.

It has the best benefit / time ratio and the most benefits.

Tools Comparison: The learning curve vs benefits of that tool for data manipulation

Our Workshop Method

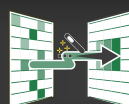

Once you register, you'll receive a set of files that you can check out before the course.

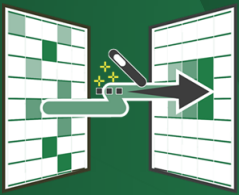

2 Live Online Sessions, 4 hours each, delivered in 2 days to Master Power Query

A complete session to address any questions regarding the topics covered in the course

Power Query Workshop

The Instructors

Ken Puls, CPA, FCMA

Is a Chartered Professional Accountant, blogger, author and trainer with over 20 years of business experience. His passion lies in exploring tools to turn data into information, and teaching others how to benefit from them.

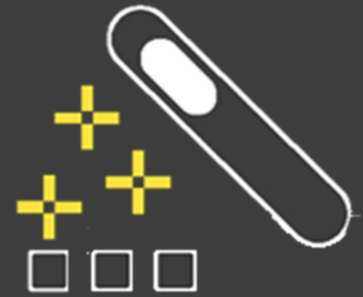

He has held the Microsoft MVP distinction since 2006, and has been recognized as a Fellow of his accounting organization.

Miguel Escobar

Is an Excel specialist turned into BI specialist using the latest tools from Microsoft for BI – Power BI. He is the co-author of 'M is for Data Monkey', blogger and also Youtuber of powerful Excel video Tricks.

He also holds the Microsoft MVP distinction and Microsoft Certified Professional for Excel.

Tricks & Patterns

Available Online!

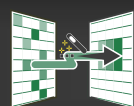

Magic at your Fingertips

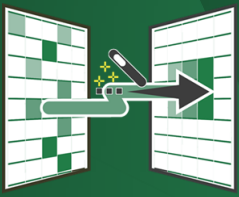

Ready to use Power Query Patterns for multiple scenarios:

- Merging multiple Tables
